

Senior Traffic Engineer | NYC

Sam Schwartz Consulting, LLC, presents you with a rare opportunity to come work for a growing firm where traffic engineering and transportation planning is our core business. We are a small firm that solves big problems, and we meet our clients' needs through an interdisciplinary approach to planning and engineering. We are a company with a dynamic culture ingrained in Ingenuity, Accessibility, and Integrity, and we pride ourselves with making the journey better for our clients and our communities.

As a specialized transportation planning, engineering, and environmental firm, we are actively solving problems across the country for a mix of private and public sector clients. Our traffic engineering team is continually growing, and we are currently seeking an experienced and confident **Senior Traffic Engineer** for our NYC office who is eager to work on a wide variety of transportation projects—be it traffic impact studies, traffic simulation/modeling, neighborhood transportation studies, multi-modal analyses, or safety studies—and who would be responsible for successfully leading projects and tasks from initiation to completion.

The candidate must be able to work in a collaborative group environment, manage priorities, stay organized, think creatively, and meet the following minimum qualifications:

- Bachelor's degree in civil or transportation engineering
- 6 - 15 years of experience in traffic engineering and/or transportation planning, preferably in the New York metro area
- Registered professional engineer, preferably in NY
- Expertise in Synchro/SimTraffic and VISSIM or AIMSUN
- Excellent written and verbal communication skills

Interested candidates that meet the minimum qualifications should forward a cover letter and resume to jobs@samschwartz.com with "Senior Transportation Engineer-NYC" in the subject line. Work samples and references will be requested.
