

## Job Description

### Civil Associate I/Transportation Planner - (191037)

**Job Type** Full-Time Exempt

**Primary Location** US-NJ-Hamilton

#### Description

### WHO WE ARE

Supported by more than 3,000 employees in nearly 100 locations across the United States, we provide a full continuum of engineering and consulting services, including design, planning, architectural, environmental, construction and program management. Our clients include U.S. federal, state and municipal governments, foreign allied governments, and a wide range of commercial clients. Michael Baker is committed to delivering a standard of excellence that fosters a culture of innovation, collaboration and technological advancement to help solve our clients' complex challenges.

### TRANSPORTATION PLANNING & ENGINEERING PRACTICE

We create, integrate, visualize and communicate infrastructure planning concepts as they move from the initial vision through implementation. Our planning professionals build strong client partnerships, working with residents, businesses, developers, educational and medical organizations, state and local governments, the military and other federal agencies to successfully plan the future of their communities or institutions. At Michael Baker International, we focus on people and places, improving communities and creating more sustainable, convenient, equitable, healthful, efficient, and attractive places.

### DESCRIPTION

The Civil Associate I/Transportation Planner will primarily be responsible for reviewing the operational performance of transportation facilities and the development and review of conceptual improvements to address identified deficiencies under the direction of a project manager. Additional responsibilities will include:

- Reviewing and analyzing the operational performance of facilities
- Developing and reviewing concept development studies for infrastructure projects
- Providing direct support to client project managers
- Directly interacting with clients, stakeholders and the general public

### PROFESSIONAL REQUIREMENTS

- Bachelor's degree in Civil Engineering. A Masters in Transportation Engineering or a related field is preferred.
- 0-2 years of progressive traffic engineering/transportation planning experience. Familiarity and experience with New Jersey DOT, Port Authority of New York and New Jersey, and New Jersey Turnpike Authority project development process and design standards is highly desirable. Familiarity with NY State and NY City DOT standards and process is also desirable.
- A Engineer-in-Training (EIT) certificate and be on-track to obtain a PE License within two years.
- The ability to manage multiple tasks and assignments independently under limited supervision
- Naturally, you will need excellent written and verbal communication skills
- Proficient in the Microsoft Office suite of products. Experience in traffic engineering/transportation planning software such as Autodesk's AUTOCAD, Bentley MicroStation, HCS, Synchro, SimTraffic, and ArcGIS is highly desirable.
