Senior Traffic Manager (ID# 43862)

New York, NY

Category: Traffic Engineering

Job Type: Full Time

Minimum Experience: 15+

Required Education: Bachelor's Degree

Job Description

Be involved in projects with our Traffic Engineering Team and be a part of a growing organization that meets our client's objectives and solves their challenges.

At WSP, we are driven by inspiring the right people to be part of our future-focused business objectives. Our devotion to teamwork has allowed us to build communities and expand our skylines. Here at WSP, anything is within our reach- and yours as a WSP employee. Come join us and help shape the future!

WSP is currently initiating a search for a Senior Traffic Manager for New York City, NY.

Duties and Responsibilities:

- Work directly with clients and take an active role for expanding our services in New York City Metropolitan area.
- Responsible for a diverse range of operational and business development activities.
- Provide technical analysis for a wide range of transportation infrastructure and land development projects.
- Perform technical review of Synchro, VISSIM, and other traffic engineering analysis software.
- Interface with staff from a range of other disciplines (civil, structural, planning, geotechnical, etc.) to support a diverse range of projects.
- Perform a range of marketing and business development activities, including outreach and coordination with existing and potential clients, identifying and leading pursuits, developing technical proposals, and interfacing through professional organizations.
- Assess and expedite work sharing to meet area delivery needs with clients and projects.
- Work cooperatively with clients and existing staff to expand the traffic engineering team.

Job Requirements

Required Skills:

- Positive attitude and people skills that constitute a team player.
- Demonstrated passion for winning and the ability to instill passion in others.
- Working knowledge of appropriate Federal Highway Administration, AASHTO, state DOT, and other relevant guidelines, including the MUTCD and the AASHTO Green Book.
- Knowledge of traffic engineering tools, including Highway Capacity Manual/Highway Capacity Software, Synchro/SimTraffic, VISSIM/VISUM, and other equivalent modeling and analysis tools.
- Knowledge of traffic control device design, including developing design plans, specifications and estimates for final construction documents.

- Ability to establish partnerships with internal and external project management, client representatives, government agencies, and other organizations.
- Project Management experience and knowledge of and relationships with professional associations.
- Ability to manage staff to effectively deliver projects on deadlines, including managing multiple staff working on multiple projects.
- Ability to train and mentor younger staff in the profession of traffic engineering & ITS.
- Ability to market the skills of the traffic engineering and ITS practice.
- Ability to work in a corporate environment, communicating with a wide range of professional skill sets.

Talent is the essence of meeting our client's objectives, goals and challenges. If this sounds like a fit for you, we'd love to have that first discussion of you joining our team.

Minimum Qualifications:

- 15+ years of experience in managing traffic engineering design and construction projects.
- Demonstrated track record of working with clients throughout the region and the state.
- New York PE license, and/or ability to obtain PE licenses in NY within six months (PTOE certificate is desirable)
- Demonstrated business development skills.
- Experience with MicroStation, and/or AutoCAD Civil 3D is desirable.
- Excellent verbal and written communication skills.
- A strong background in traffic engineering, ITS and client/project management.
