

Transportation/Traffic Engineer – New York City

Radin Consulting is looking for a Transportation/Traffic Engineer to assist with our growing workload in our downtown Manhattan office. We provide planning and engineering consulting services to the transportation market in the Northeast. Our team is headed by seasoned engineers and planners and is supported by expert staff. This individual must have the ability to interact well with client management teams and must be a team player.

Responsibilities

- Complete work accurately and in accordance with quality control and quality assurance procedures.
- Effectively communicate and coordinate with other members of the Design Team.
- Ability to multi-task and communicate schedule and progress on assigned tasks.
- Field Measurements of Intersections, roadways, traffic data collection, capacity analysis, traffic simulation and modeling, transit planning, and the preparation of reports for traffic engineering and transportation planning projects for various clients.

Qualifications

- Bachelor of Science in Civil/Transportation Engineering or equivalent required
- EIT Certification preferred
- 0-2 years of prior engineering experience
- Exposure to MicroStation and/or AutoCAD
- Strong written and oral communication skills
- Must be able to work independently and as part of a team
- Excellent organization, schedule and budget management skills
- Knowledge of MS Office; PPT, Word, Excel, Explorer, Access and Adobe
- Willingness to travel as projects require.

Salary & Benefits

Salary will be based on qualifications. Excellent benefits are included. A writing sample may be requested. We are an Equal Opportunity Employer and offer very competitive vacation and medical benefits, as well as a 401k plan. Please visit <http://radinconsulting.com/careers/> to submit your resume today.
